

FAPS 2006-2007  
WEDNESDAY NIGHT LECTURE SERIES  
"SOUTH FLORIDA: IN THE MIX"

---

**APRIL 11, 2007**  
**"LEED and Sustainable Development in South Florida"**

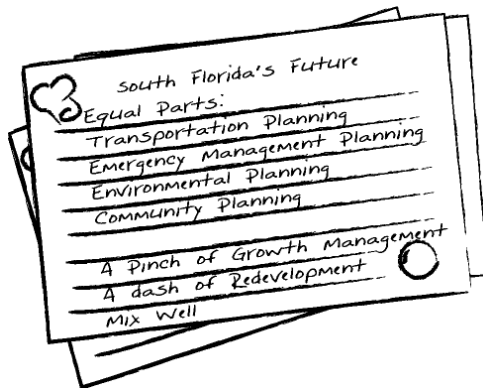

**Lecture by:**  
**Rob Hink, LEED AP**  
Principal, The Spinnaker Group  
Vice President, US Green Building Council - South Florida Chapter  
&  
**CAROLYN MITCHELL**  
Director of Landscape Architecture, Zyscovich, Inc.  
President, US Green Building Council - South Florida Chapter

The issues facing planners in South Florida are both exciting opportunities and overwhelming obstacles. The Board Members of the Florida Atlantic Planning Society have embraced the concept that planning in South Florida is like no other. The concept for this series is to discuss the individual components that make up an effective plan. The objective is to formulate an idea on how to achieve the ultimate goal – better planning in South Florida.

LEED, LEED, LEED...It used to be all about Location! The US Green Building Council's LEED Green Building Rating System ([www.usgbc.com](http://www.usgbc.com)) has been implemented by many municipalities, private developers, and institutions both locally and internationally to promote sustainable development and even place branding. Yet many planners are not clear on what LEED is and how it can be utilized in their projects.

Please join FAPS for this fascinating lecture on the challenges, opportunities and latest updates in LEED and Sustainable Development in South Florida. Both Rob Hink and Carolyn Mitchell have extensive experience with LEED and its application into the built form of South Florida, including LEED Master Plan projects in Hollywood Beach and Coconut Creek and projects with local airports and universities. Please go to [www.thespinnakergroupinc.com](http://www.thespinnakergroupinc.com) & [www.zyscovich.com](http://www.zyscovich.com)

This lecture is scheduled for **Wednesday, APRIL 11, 2007** at the Fort Lauderdale Campus, HEC building, 11<sup>th</sup> Floor, room 1110. Complimentary food and drinks are served at 5:00PM. The lecture begins at 5:30PM and will conclude at 6:45PM. This is the final Wednesday Lecture for the school year – we hope you will join us!

Please refer to [www.fau.edu/durp/faps](http://www.fau.edu/durp/faps) for date changes and other announcements.
