

Coastal Management

The purpose of the Coastal Management element is to provide for the protection of residents and property in those campuses or portions of campuses with the coastal area of the host community, and to limit expenditures, and where appropriate, restrict development, in those areas subject to destruction by natural disasters within the coastal high hazard area.

Coastal High Hazard Zone

The Davie Campus is inland and out of the high hazard zone; therefore this site is not subject to the Coastal Management issues.

Emergency Sheltering

Broward County has an abundance of public shelter space in the Broward County Schools. Consequently FAU is not required to provide shelter space for emergencies. The University does however have an Emergency Operations Plan for evacuation and can serve as immediate shelter from storm conditions if necessary.
