MEMORANDUM

TO: Dr. Anita Pennathur, Chair
College of Business Graduate Curriculum Council

FROM: Dr. Mark Kohlbeck
Director of College of Business PhD Programs
School of Accounting
mkohlbec@fau.edu

SUBJECT: Update of Required Courses in University Catalog

The College of Business wishes to modify the required course listings for each of the COB PhD concentrations. Prior to 2019, the catalog did not include course listings for the COB PhD Program. In 2019, the Registrars office added the course listing tables for each concentration based on the degree audit information that was provided to the Registrar for the Accounting, Finance, and Management concentrations. The requested edits accomplish the following:

1. Standardize the presentation across concentrations
 - Foundation and Statistics Courses
 - Concentration Core Courses
 - Electives Courses
 - Dissertation
2. Add the course listing table for the Marketing concentration (this information was not previously available to the Registrar); the ITOM tables will be added separately when the information is complete
3. Properly reflect special topics courses as electives

DOCTORAL PROGRAM

Doctor of Philosophy with Major in Business Administration

The College of Business offers a Doctor of Philosophy (Ph.D.) degree in Business Administration with concentrations in Accounting, Finance, Information Technology, Management and Marketing (collectively referred to as the specialized concentrations) and an ~~Executive Doctorate~~Executive concentration. Required courses consist of a set of tool courses (such as statistics and econometrics), a set of courses tailored to the student's concentration and a dissertation.

The doctoral program's specialized concentrations prepare students for university teaching and research. Students entering the doctoral program and pursuing a specialized concentration typically have a master's in a Business Administration program and require about four years to complete the requirements for the Ph.D. in Business Administration. Students accepted in the program are expected to enroll on a full-time basis. The Executive Doctorate concentration of the doctoral program enhances research and consulting capabilities. Students entering the doctoral program pursuing an Executive Doctorate have significant business experience and require three years to complete requirements for the Ph.D. in Business Administration.

Admission Requirements

Admission to the program is restricted to students who show exceptionally high promise for mastering the conceptual and analytic tools required for doctoral study in business. Evidence of such promise is obtained by evaluation of previous graduate and undergraduate class standing, the score on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE), letters of recommendation and the applicant's statement of career goals. In addition, if feasible, applicants are interviewed either in person, by video or by telephone. The minimum criteria for admission include the following:

1. The student must satisfactorily meet the general University requirements for admission to graduate programs. International applicants must also satisfactorily meet any additional requirements of the Graduate College. Additional details are found [here](#).
2. The student must hold a master's in a related discipline or an M.B.A. degree, preferably from an AACSB-accredited, graduate-level institution.
3. Typically the student presents a minimum score of 600 on the GMAT or a comparable score on the GRE, taken within the last five years.
4. An applicant whose native language is not English must present a minimum score as set by the Graduate College on the Test of English as a Foreign Language (TOEFL) or the Test of Spoken English (TSE). Applicants who have completed a minimum of two years of postsecondary education in the United States are exempt from this requirement.

An entering student is expected to be proficient in computer and quantitative skills. An exceptionally qualified student with a master's degree in a non-business discipline may also enter the program, but must undertake additional work that is sufficient to establish knowledge of the material comprising the AACSB M.B.A. core requirements. The minimum criteria do not guarantee acceptance into the program, as enrollment in any year is limited.

Application Process and More Information

For details about admission and degree requirements for the Ph.D. degree in Business Administration, contact ~~Judith Benson~~Program Admissions, benson@fau.edu, BusinessPhD@fau.edu, 561-297-4476 ~~2179~~.

Degree Requirements

1. Basic Tool Areas: Doctoral-level courses such as Statistics, Quantitative Methods and Economics.
2. Area of Concentration: Several courses are required in the student's area of concentration.
3. Comprehensive Examination: Students pursuing specialized concentrations must pass a comprehensive examination that will be administered in the area of the concentration after completion of all required coursework.
4. Dissertation: A minimum of 18 credits of dissertation must be taken, and the completed dissertation, reflecting an original contribution to knowledge, must be successfully defended at both the proposal stage as well as at the final

completed stage.

5. A minimum of 80 credits is required (including dissertation credits).

6. To remain in good standing, Ph.D. students must maintain a minimum grade point average of 3.0 (based on a 4.0 scale) on all courses taken for the doctoral program (individual concentrations may have higher minimums). If a Ph.D. student receives a grade below "B" for any course or has a grade point average below the minimum permitted for the student's area of concentration, a Ph.D. committee of professors within the student's area of concentration will decide whether any action (such as remedial coursework requirements, dismissal, etc.) should be taken.

DOCTORAL PROGRAM

Doctor of Philosophy with Major in Business Administration

The College of Business offers a Doctor of Philosophy (Ph.D.) degree in Business Administration with concentrations in Accounting, Finance, Information Technology, Management and Marketing (collectively referred to as the specialized concentrations) and an Executive concentration. Required courses consist of a set of tool courses (such as statistics and econometrics), a set of courses tailored to the student's concentration and a dissertation.

The doctoral program's specialized concentrations prepare students for university teaching and research. Students entering the doctoral program and pursuing a specialized concentration typically have a master's in a Business Administration program and require about four years to complete the requirements for the Ph.D. in Business Administration. Students accepted in the program are expected to enroll on a full-time basis. The Executive Doctorate concentration of the doctoral program enhances research and consulting capabilities. Students entering the doctoral program pursuing an Executive Doctorate have significant business experience and require three years to complete requirements for the Ph.D. in Business Administration.

Admission Requirements

Admission to the program is restricted to students who show exceptionally high promise for mastering the conceptual and analytic tools required for doctoral study in business. Evidence of such promise is obtained by evaluation of previous graduate and undergraduate class standing, the score on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE), letters of recommendation and the applicant's statement of career goals. In addition, if feasible, applicants are interviewed either in person, by video or by telephone. The minimum criteria for admission include the following:

1. The student must satisfactorily meet the general University requirements for admission to graduate programs. International applicants must also satisfactorily meet any additional requirements of the Graduate College. Additional details are found [here](#).
2. The student must hold a master's in a related discipline or an M.B.A. degree, preferably from an AACSB-accredited, graduate-level institution.
3. Typically the student presents a minimum score of 600 on the GMAT or a comparable score on the GRE, taken within the last five years.
4. An applicant whose native language is not English must present a minimum score as set by the Graduate College on the Test of English as a Foreign Language (TOEFL) or the Test of Spoken English (TSE). Applicants who have completed a minimum of two years of postsecondary education in the United States are exempt from this requirement.

An entering student is expected to be proficient in computer and quantitative skills. An exceptionally qualified student with a master's degree in a non-business discipline may also enter the program, but must undertake additional work that is sufficient to establish knowledge of the material comprising the AACSB M.B.A. core requirements. The minimum criteria do not guarantee acceptance into the program, as enrollment in any year is limited.

Application Process and More Information

For details about admission and degree requirements for the Ph.D. degree in Business Administration, contact Program Admissions, BusinessPhD@fau.edu, 561-297-2179.

Degree Requirements

1. Basic Tool Areas: Doctoral-level courses such as Statistics, Quantitative Methods and Economics.
2. Area of Concentration: Several courses are required in the student's area of concentration.
3. Comprehensive Examination: Students pursuing specialized concentrations must pass a comprehensive examination that will be administered in the area of the concentration after completion of all required coursework.
4. Dissertation: A minimum of 18 credits of dissertation must be taken, and the completed dissertation, reflecting an original contribution to knowledge, must be successfully defended at both the proposal stage as well as at the final completed stage.

5. A minimum of 80 credits is required (including dissertation credits).

6. To remain in good standing, Ph.D. students must maintain a minimum grade point average of 3.0 (based on a 4.0 scale) on all courses taken for the doctoral program (individual concentrations may have higher minimums). If a Ph.D. student receives a grade below "B" for any course or has a grade point average below the minimum permitted for the student's area of concentration, a Ph.D. committee of professors within the student's area of concentration will decide whether any action (such as remedial coursework requirements, dismissal, etc.) should be taken.
