Subject: RE: the course

Rui,

This looks ok. It doesn't overlap with anything we offer in psychology. Good luck with the course.
Dave

Dear Dr. Wolgin,

Please review the syllabus attached. Thank you very much for your time.

Best,

Rui Tao

Subject: Re: the course

Rui,

I solicited input from several members of the department and we do have some concerns. First, many of the topics (peripheral and central anatomy, feeding, reward & punishment) are covered in graduate courses offered in psychology. It is possible that by focusing on clinical aspects, your course would not overlap, but this is not clear from the syllabus. A more detailed syllabus would be helpful. Second, there is no textbook and no list of articles in the syllabus. Again, that makes it difficult to judge whether the topics overlap or not. Could you send me a more detailed overview of the topics and readings? Thanks.

Dave

Dear Dr Wolgin,

I am preparing to open a graduate course (600+) regarding the autonomic regulation. Attached is the syllabus. Please review it and let me know if there is a conflict with your department. Thank you very much.

Regards,

Rui Tao
