

# Undergraduate Research Opportunity in Renewable Energy

## NSF REU Site in Marine Renewable Energy

The **Southeast National Marine Renewable Energy Center at FAU** is hosting an **intensive summer research program** focused on science and engineering challenges related to the environmentally friendly creation of electricity from ocean currents.

**Research will focus on: resource assessment, system design, and environmental impacts.**

This ten-week program emphasizes training, mentoring and research, preparing students for graduate studies or careers in science, technology, engineering or math disciplines.

Work days will typically run from 8 a.m. to 5 p.m, including student development and training events held 2 to 3 times weekly.

Housing will likely be provided on FAU's beautiful Boca Raton or Harbor Branch Oceanographic Institute campuses (Covid permitting), or equivalent housing stipends (**\$40/day**) will be provided. Participant stipends of **\$600/week** will be also provided, along with a food allowance of **\$150/week**.

**A remote version of this program will be held if needed due to COVID-19 (see website).**

**Registration opens:**  
Dec. 15, 2022

**Registration deadline:**  
Feb. 23, 2023

*\*Applicants will be notified on or before March 2, 2023 regarding acceptance to this program.*

*This program is funded through the National Science Foundation's Research Experiences for Undergraduates program (EEC-1659468).*
