	Department Chemistry and Biochemistry College of Science	
<b>Program Name</b> Bachelor of Science with Major in Chemistry: Biochemistry Program	<input type="checkbox"/> New Program <input checked="" type="checkbox"/> Change Program	<b>Effective Date (TERM &amp; YEAR)</b> <u>202005</u>
<p>Please explain the requested change(s) and offer rationale below or on an attachment</p> <p>The proposed changes in the Biochemistry program consists of a revised combination of requirements and electives that ensure a strong foundation in the chemical and biological sciences while providing the flexibility to tailor the curriculum to satisfy specific interests or career goals. These changes allow students to elect courses that would prepare them better for a continuation of their education in graduate and professional schools and/or for a highly competitive STEM job market.</p> <p>The proposed changes may affect Department of Biological Sciences and Department of Psychology since the program requires minimum of 3 courses from the Department of Biological Sciences and 1 course from the Department of Psychology, respectively. However, we don't expect the student numbers to increase significantly compared to currently enrolled students in these courses.</p>
