**Subject:** Data Science Certificate

Hello Dr. Steinwandt,

We would like to propose to add "CAP 5768 Introduction to Data Science" as an option to the Data Science Certificate, please see the attachment. We received this request from some students, which showed interest in adding this option. Taking the data science at the graduate level would allow them to count it as a graduate course in the combined BS/MS programs.

Please let me know if Mathematical Science department approves adding this course to the certificate.

Thanks,
Mihaela Cardei
