Sorry Nich - we have no objections to including these courses.

Hi Sarah,

I hope you are well. I'm just following up on the last email and seeing if it is permissible for the Honors College Neuroscience concentration to include some electives taught in the department of Biological Sciences.

Thank you once again for your time!

Nich

Subject: Neuroscience concentration

Dear Dr. Milton,

Earlier in the semester, I reached out to you about the Honors College Biological Chemistry concentration including courses from the Departmental of Biological Sciences program as electives. Now, I am requesting permission for our Neuroscience concentration (attached).

The classes that would be electives would be:

BSC 2085 Anatomy and Physiology; PCB 4233 Immunology; PCB 4832C Neurophysiology.

Please let me know if you have any questions.

Thank you once again for your help,

Nich
