**Subject:** Re: Request for support of Geosciences curriculum update

Dear Tiffany:

Thank you for your email. The physics department recognizes the proposed changes to the curriculum and strongly supports them.

Thank you and have a great weekend! --Luc

**Subject:** Request for support of Geosciences curriculum update

Luc,

Just a quick note to make you aware of a couple of changes that we're making to our undergraduate curriculum that involves courses from your department. For our B.S. Geosciences Geology concentration, we plan to add PHY 2048L as a requirement. Additionally, at the moment students pursuing this major are required to take either PHY 2044 or PHY 2049. We plan to remove PHY 2044 as an option, and thus simply require them to take PHY 2049 moving forward.

I would greatly appreciate it if you would kindly respond to this email acknowledging these changes and indicating your support.

With thanks,  
Tiffany
