Hi Eric:

I hope this email finds you well. No conflicts exist from architecture, none whatsoever.

John

Hi Eric-

As you may have seen in some of the SCMS faculty replies, there is strong support for this course in the School. We have no objections to the course.

Thanks

David Williams

Director, SCMS

Subject: Course Proposal

Hello,

My name is Eric Landes and I am an Associate Professor in VAAH. I am putting together a course proposal for a summer class that I have run for a few years called "Building a Website Portfolio". It is designed to provide students who are near graduation the tools for creating their own portfolio websites.

The course carries the ART designation so that non-majors are welcome to participate. It is open, really, to any student needing a professional web-based portfolio. It is built entirely without coding so is quite easy for students unfamiliar with web technology. The course also asks students to consider how the portfolio fits within their professional practice.

I am writing you to both make you aware of this as a course offering, and in the immediate sense to confirm that this course does not conflict with any course you are currently offering.

I don't see a conflict, but would like to know course number so we could consider adding this into the curricula for a track.

Tom
